TERMS OF ACCEPTANCE, POLICIES, AND CONSENT FOR CARE

1. All first visit charges are payable when services are rendered.
2. I authorize the taking of photographs and x-rays and performance of other diagnostic and therapeutic procedures to be used for treatment purposes.
3. I hereby give consent to have chiropractic adjustments performed in a semi-open room setting. I understand that a semi-open room setting does not ensure complete privacy and will inform the staff if I need to discuss any confidential information in private.

In order to provide for the most effective healing environment, most effective application of chiropractic procedures and the strongest possible doctor-patient relationship, it is our wish to provide each patient with a set of parameters and declarations that will facilitate the goal of optimum health through chiropractic.

To that end, we ask that you acknowledge the following points regarding chiropractic care and the services that are offered through this clinic:

- A. Chiropractic is a very specific science, authorized by law to address spinal health concerns and needs. Chiropractic is a separate and distinct science, art and practice. It is not the practice of medicine.
- B. Chiropractic seeks to maximize the inherent healing power of the human body by restoring normal nerve functions through the adjustment of spinal subluxation(s). Subluxations are deviations from the normal spinal structures and configurations that interfere with normal nerve processes.
- C. The chiropractic adjustment process, as defined in the "law of this jurisdiction" involves the application of a specific directional thrust to a region or regions of the spine with the specific intent of re-positioning misaligned spinal segments. This is a safe, effective procedure applied over one-million times each day by doctors of chiropractic in the United States alone by doctors of chiropractic.
- D. A thorough chiropractic examination and evaluation is part of the standard chiropractic procedure. The goal of this process is to identify any spinal health problems and chiropractic needs. If, during this process, any condition or question outside the scope of chiropractic is identified, you will receive a prompt referral to an appropriate provider or specialist, according to the initial indications of the need.
- E. Chiropractic does not seek to replace or compete with your medical, dental or other type(s) of health professionals. They retain responsibility for the care and management of medical conditions. We do not offer advice regarding treatment prescribed by others.
- F. Your compliance with care plans, home and self-care, etc., is essential to maximum healing and optimal health through chiropractic.
- G. We invite you to speak frankly to the doctor on any matter related to your care at this facility, its nature, duration or cost, in what we work to maintain as a supporting, open environment.

I, _____ have read and fully understand the above statements.
(print name)

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my satisfaction. I therefore accept chiropractic care on this basis.

Informed Consent For Chiropractic Care

Chiropractic care, like all forms of health care, while offering considerable benefit may also provide some level of risk. This level of risk is most often very minimal, yet in rare cases injury has been associated with chiropractic care. The types of complications that have been reported secondary to chiropractic care include sprain/strain injuries, irritation of a disc condition, and rarely, fractures. One of the rarest complications associated with chiropractic care, occurring at a rate between one instance per one million to one per two million cervical spine (neck) adjustments may be a vertebral artery injury that could lead to stroke.

Prior to receiving chiropractic care this Chiropractic office, a health history and physical examination will be completed. These procedures are performed to assess your specific condition, your overall health and, in particular, your spine health. These procedures will assist us in determining if chiropractic care is needed, or if any further examinations or studies are needed. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another health care provider. All relevant findings will be reported to you along with a care plan prior to beginning care.

I understand and accept that there are risks associated with chiropractic care and give my consent to the examinations that the doctor deems necessary, and to the chiropractic care including spinal adjustments, as reported following my assessment.
